Wahl Professional Introduces New Cordless Detailer Li

The next generation of Detailer runs corded or cordless and uses Lithium-Ion technology for a longer cutting time between charges.

Sterling, IL (July 30th, 2019) – Wahl Professional is excited to announce the addition of its newest trimmer, the **Cordless Detailer Li**. With the same great look and feel of the original Detailer, the Li comes with features you won't be able to barber without.

With a lightning fast T-wide blade that provides more power when cutting, a cordless feature, and a swivel cord that allows for flexibility and ease when charging, the Cordless Detailer Li is guaranteed to be a favorite among professionals.

“The fact that it's lightweight and has a faster blade speed lets me to get super close on all my cuts, leaving my line-ups perfectly detailed,” says Wahl Education and Artistic Team (W.E.A.T.) member Miguel Rosas ([@newstyle84](https://www.instagram.com/newstyle84)).

This blade is the same one used in the original Detailer; however, the Li allows the blade to move at a faster speed, allowing for incredibly close trims and clean lines. On a full battery charge, this trimmer can easily handle up to 100 minutes of cutting time before needing to be charged again.

“This is definitely one of my new favorite tools. Wahl has mastered this tool in every form. The fact that it's cordless, but is very powerful is what I love, says Rosas. “The run time is insane and

the fact that there's a weighted docking station allows me to easily let it stay charged all day. It is by far the best cordless trimmer in the industry.”

Ready for that charge?

It's easy to know when the Cordless Detailer Li is ready for a charge. Located on the front of the Li is a blue light that will flash to indicate a low battery. When placed on the charger, the blue light pulses to indicate the tool is in charging mode. When fully charged, the blue light will glow steadily.

When it's time for a charge, the Detailer Li trimmer comes with an innovative design that allows the charging cord to move around with ease. Unlike most charging stands that have the cord coming out of the bottom, this model allows the cord to come out from the back or the side of the charging base, allowing it to sit flush to the mirror of the barber's or stylist's station. Also, the charging station is weighted, giving it stability and allowing it to stay in place when the Li is removed.

Wahl Professional will be introducing the new Cordless Detailer Li in July in Las Vegas at Cosmoprof North America and will begin shipping the product August 1st.
